transitional duty, minimized lost work days

FIND OUT HOW OUR TREATMENT QUALITY INDEX ENSURES COMPLIANCE AND REDUCES CLAIM DURATION BY 13%

Our treatment compliance guidelines are determined by cross referencing the diagnoses and procedures on the medical bill with Evidence Based Medicine (EBM) and published workers' compensation treatment guidelines.

This means Resolution Managers have enhanced insight to refer to the best providers and can identify and intervene to ensure appropriate treatment.

Our GBCARE platform sees an increase in the number of appropriate, effective medical procedures that will get your team back to work safer and quicker.

Find out how we can decrease the total claim cost and duration for your business through our GBCARE technology.
